Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Monday 21 Nov 2022 until 23:59 on Tuesday 22 Nov 2022

Forecast Issued on Sunday 20 Nov 2022 at 08:18

Confidence: Unsettled through the week ahead, with spells of rain or showers and also colder with a wintry mix on the higher slopes at times. Low confidence for details, especially in relation to timings, but also lots of uncertainty in exact events on Monday.

Headline for Monday 21 Nov 2022: A low pressure system expected to move across the area to give a wet and windy day.

Mountain weather hazards on Monday 21 Nov 2022

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales Medium Likelihood	**Severe chill effect** Low Likelihood	**Poor visibility** High Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** High Likelihood	**Strong sunlight** No Likelihood

Forecast for Monday 21 Nov 2022

Weather: Cloud thickening overnight but remaining dry until dawn. Rain soon spreading from west in morning and becoming heavy and prolonged. Becoming more showery through the afternoon and evening, and eastern parts may see some drier interludes, but some very heavy rain is possible at times in west. Becoming colder later with rain turning to sleet or perhaps snow on the higher tops.

Chance of cloud-free hill tops above 600m: Possibly 20% in east, but generally little chance.

Low cloud and visibility: Extensive cloud above 500-700m by morning with patches possibly broken down to 400m in rain, but there could be a few breaks over eastern hills. Good visibility falling moderate occasionally poor in rain, but widespread poor or very poor at height.

Freezing Level*	1100m	1300m	1300m	1200m	1400m	1200m	1200m	1100m	900m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Some considerable doubt as to track of low pressure moving southeast across the SW of the UK, with the risk of stronger winds and possibly shifting into the west or southwest then later northwest, should the low be further north.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Sun 20 Nov 2022	4.6mm	4.8mm	5mm

Forecast for Tuesday 22 Nov 2022

Weather: Rain or showers overnight, with a wintry mix on the tops. Further rain or showers through the day, but lower chance of sleet or snow on the tops with freezing level rising. Drier with some brighter spells in the east and becoming mostly dry and somewhat brighter through the afternoon, then dry with clear spells in the evening.

Maximum wind: North or northeast 15-20mph becoming westerly 25-30mph in the afternoon then southwest 20-25mph in evening

Chance of cloud-free hill tops above 600m: 10% in west until late afternoon then 40% and mainly 40% in east, but around 70% by evening.

Low cloud and visibility: Generally extensive above 600-800m and lowering to 450m at times, although more broken in east and gradually becoming scattered to broken 700-900m in the afternoon. Mostly good visibility at lower levels, but reductions in rain and showers and quite widely poor or very poor at height

Temperature: **Valleys:** Plus 2 C rising to 8 C
At 600m: 2 C rising to 4 C
Freezing level: Rising to 1100m by morning
